

How to mow S.A.F.E.

Send kids inside.

Children should NOT be outside when someone is mowing. Suggested mowing age for push mowers is 12 years old, and 16 years old for riding mowers.

Always mow forward.

Backing up while mowing increases the risk of accidentally hitting a child or other object you didn't see behind you.

Follow the no riding rule.

Never allow children to ride on a lawn mower. Riding mowers are powerful machines—not toys—and should never be used for fun or transport.

Educate yourself.

Before using a lawn mower, learn how it works and review the mowing S.A.F.E practices. A few minutes of prep can prevent serious injuries.

Following these tips can save lives!
